NEW METROPOLITAN PERSPECTIVES 2016

BRIEF INSIGHT

The second edition of the "NEW METROPOLITAN PERSPECTIVES" International Symposium is specifically dedicated to the main topic: "Strategic planning, spatial planning, economic programs and decision support tools.

Contributions for a multidisciplinary integrated approach, through the implementation of Horizon/Europe2020"

NEW METROPOLITAN PERSPECTIVES 2016

DESCRIPTION

ISTH2020

international
symposium
second
edition

CONFERENCE SINCE 2014

The Symposium is part of the scientific debate that the University Lab "LaborEst" in partnership with a qualified international network of academic institution and scientific societies, promotes on issues related to the competitiveness of metropolitan cities and inland areas in least developed and developing regions.

"Strategic planning, spatial planning, economic programs and decision support tools. Contributions for a multidisciplinary integrated approach, through the implementation of Horizon/Europe2020" (ISTH2020)

The event is organized with the aim to receive contributions from national and international scientific community on integrated development strategies and research according to the directions of Europe 2020 and Horizon 2020.

The final reflections of the first edition of ISTH (2014) round table have demonstrated that the debate on strategies to effectively implement the EU 2020 goals aiming at a greater involvement of cities and regions in the European policies is still open. The territorial cohesion policy at global and local level, including through the assumption by the Commission of the 'smart specialization', better known as approach 'RIS3', led to controversial discussions, such as on the relationship between specialization and diversification up to question on the current role of knowledge and technologies to the European economy.

In addition, the recent European documents, among others the Leipzig Charter, the VI Report on Economic and Social Cohesion, and EU 2020, identifies a number of major challenges, such as: the challenge of competitiveness, the knowledge society, the domestic and international accessibility, and the inclusion and social cohesion.

NEW METROPOLITAN PERSPECTIVES 2016

AIMS

3500

 contacts
each year

The aims of the Symposium are:

1. Contributing to the international dialogue, promoting joint research activities according to the objectives of the 2014–2020 programming period
2. Stimulating the multi-disciplinary scientific debate on the new frontiers of strategic planning, spatial planning, economic programs and decision support tools, within the urban-rural areas networks and the metropolitan cities, best laying in least developed and developing regions.
3. Promoting an holistic approach, through specialized inputs, to resource allocation decision-making and urban/rural spatial organization.

In the contest of the second edition of “New Metropolitan Perspectives”, reflections are welcome on cities’ ability to implement metropolitan dynamics and to improve their competitiveness while exploiting the virtuous and synergic linkage between urban and rural areas.

NEW METROPOLITAN PERSPECTIVES 2016

IMPORTANT ABOUT THE CONFERENCE

„Papers addressed the main topic through a multidisciplinary perspective, pursuing an integrated approach in order to deal with strategic planning, spatial planning, economic programs and decision support tools, applied to metropolitan cities and inland areas in least developed and developing regions.“

Theoretical and experienced-based contributions that fit with the following themes were selected:

-  (1) URBAN REGENERATION - COMMUNITY-LED PRACTICES AND PPP
Keywords: Transforming, Participating, Consultation, Negotiating, Cooperating, New Governance, Marginal areas, Social Housing
-  (2) INLAND AND URBAN AREAS IN TERRITORIAL COHESION STRATEGIES
Keywords: Competitiveness, Intersectorality, Cohesion, Value Chains, Local Production Systems
-  (3) MOBILITY, ACCESSIBILITY, LOGISTICS, INFRASTRUCTURE
Keywords: Domestic and International Transport, Inter-modality, Management Plan, Smart Mobility
-  (4) HERITAGE AND IDENTITY AS DRIVER FOR SUSTAINABLE LOCAL DEVELOPMENT
Keywords: Preservation, Conservation, Enhancement, Management, Tangible and Intangible Heritage, Cultural Tourism
-  (5) RISK MANAGEMENT - INCREASING RESILIENCE TO HUMAN/NATURAL HAZARDS
Keywords: Seismicity, Hydrogeological Imbalance, Soil Protection, Pollution, Hazard, Vulnerability, Exposure

KEYNOTE SPEAKERS PROFILE

„We are proud to present three excellent keynote speakers. From their different research-perspectives, they will all touch upon the symposium theme“.

Pia Laurila is Policy Officer at the Directorate-General for Research and Innovation of the European Commission in the Unit 'Spreading Excellence and Widening Participation'. Her responsibilities include, inter alia, curating the development of the research Joint Programming Initiative 'Urban Europe – Global Urban Challenges, Joint European Solutions' on side of the Commission. She also contributes to creating greater synergies between the Framework Programmes for Research and Innovation and the European Structural and Investment Funds – the policy ambition aimed at building interactions between the two policy frameworks and their investment strategies and thus ensuring a higher impact. Before assuming her present responsibilities in 2011, she worked several years at the same DG for the FP7 Socio-economic Sciences and Humanities Theme, where her tasks included the research programme development in the area of regional economies and management of FP7 research and innovation actions.

Luigi Fusco Girard is Director of Interdepartmental Research Centre "CalzaBini" and Director of Urban Regeneration (UN-Habitat). He covers the role of Chair of the International Scientific Committee of Economics of Conservation of Cultural Heritage, ICOMOS, Paris. Full professor of "Economics and Environmental Assessment in the Department of Architecture, University of Naples "Federico II". Authors of several scientific publications such as "Cultural Tourism and Sustainable Local Development, (2009)" and "Sustainable City and Creativity : Promoting Creative Urban Initiatives, (2011)", his articles have appeared on International Journal Sustainable Development, International Journal of Technology and Management, International Journal of Environment and Pollution and Sustainability.

María Rosa Suárez-Inclán Ducassi is the President of the International Scientific Committee on Cultural Routes (CIIC) of ICOMOS. She fostered its creation and has worked hard in order to evidence the importance of Cultural Routes as a new conceptual approach to heritage resulting from those historical routes of communication which connected different people and cultures and facilitated reciprocal exchanges through their specific goals, dynamic and functionality. After obtaining the academic title of Lawyer at the Complutense University of Madrid she pursued post-graduate studies and acquired further specialisation in different national and international centres. She has since then devoted her professional life to the study and defence of culture heritage, both through different NGO and public institutions. She has undertaken numerous works in the legal and management areas and has published many studies on other topics related to cultural heritage, both outside and inside ICOMOS. She has organised many international congresses and seminars and directed the publication of their proceedings.
